Avoid the cost and hassle of setting up and maintaining VPN connections with partner organizations and providers.

Simply and securely track and send DICOM studies and reports directly from one site to another – with Vertex SDS. Utilizing DICOM TLS, you avoid the setup, and cost associated with traditional VPN or Cloud providers.

Securely Send DICOM studies: Simply send DICOM studies and reports directly from your site to a partner – securely through Vertex SDS.

Receive DICOM Studies: Vertex conforms to DICOM PS 3.15-2011 Annex B standard so it can also receive from other conforming products.

Always Encrypted: The data is encrypted in transit utilizing Transport Layer Security (TLS) and adheres to FIPS 140-2.

No Cloud Storage: Vertex SDS sends directly to another facility avoiding any third-party cloud environment. SDS is a direct secure DICOM connection – absolutely no cloud storage.
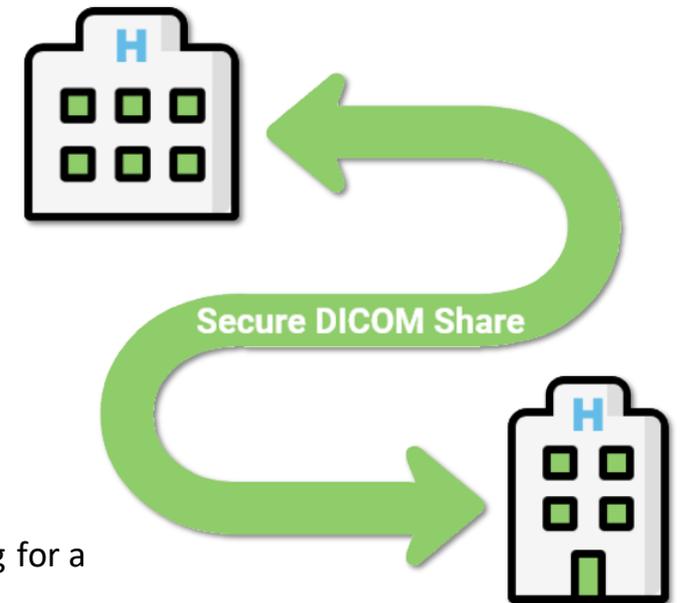

Great for Referring Physicians: Avoid the cost of setting up and maintaining VPNs. They can also send to and receive from multiple sites with one set up.

Fast Delivery: Reduce the delays in communication of time sensitive medical information. No more waiting for a CD/DVD to be delivered.

Use SDS with Other send to Destinations: Along with SDS, facilities can still send to a CD burner, cloud provider and any other export to destination.

Flexible Workflow: Use Vertex's automated processing or its drag-and-drop user interface to share with patients and providers.

Enterprise Data Sharing Option: Add Vertex Scan to collate, package, and share DICOM studies, paper, film, office documents, visible light images, videos, and other digital content.

Secure DICOM Share

Sorna®

Vertex Platform

Medical imaging made easy- the most affordable, scalable medical data systems

vertex. SHARE

Cloud-brokered medical data sharing

vertex. CD

Automated DICOM CD burners plus CD importing

vertex. video

Post-process and convert exiting video files to DICOM

vertex. capture

Compact, economical video recorder integrated with Vertex Video

vertex. scan

Add Paper Film, Digital Images and Documents to PACS- scan paper or film and include images and documents in studies

vertex. import

Reconcile Incoming DICOM and Proprietary Studies- Import DICOM and proprietary data from CDs and removable media

vertex. export

Manually send to local CD burner, removable media, and drives

vertex. SDS

Securely send studies using DICOM TLS with no VPN

vertex. route

Scheduled, Intelligent routing to any device

REVIEWER

Manage internally and externally generated DICOM and non-DICOM medical images within your role and workflow with Reviewer.

Reviewer CD
View and browse files on every CD (DICOM and proprietary) with this easy-to-use, FREE DICOM viewer software

Reviewer MD
Burn, view, store, import, and share studies from a variety of sources; send to a printer or create an encrypted DISC on the fly

Reviewer Admin
View, import, burn, share, scan, re-identify, encrypt, and MORE; do it all with this Master Edition
