Sorna Corporation Announces Reviewer Release 1.11 with Plus+ functionality

(Eagan, MN) June 4, 2012 - Sorna Corporation, a global leader in digital medical image and data distribution systems, announces the release of Plus+, an add-on option to Sorna's Reviewer software suite including: Reviewer CD, Admin, MD and Importer. The release of Plus+ adds a host of new features and enhances consistency across the enterprise.

"Physicians, Directors of Radiology, PACS Administrators and Radiology staff no longer need to be afraid of incoming CDs." said Cyrus Samari, Sorna's Vice President of Sales and Marketing. "Just put in a CD to seamlessly view, import, and share its content – never having to worry about its format or embedded viewer."

Some of the many new features and functionality in the Reviewer Plus+ option include:

- View iSite (iSyntax) & Merge (AMICAS®) DISCs
- Import proprietary DISCs as DICOM
- Avoid re-imaging patients
- Eliminate secondary requests for DICOM DISCs
- Universal DISC viewing for your referring physicians
- In-house universal DISC viewer

More information is available on the Sorna Web site at: sorna.com/reviewerplus

Choose the Reviewer edition that best suits your needs and customize it further by adding the Plus+ option.
