

FOR IMMEDIATE RELEASE

Sorna Corporation to Release Vertex[®] 3.3

EAGAN, MN – November 3, 2015 – Sorna Corporation continues to transform the medical imaging technology field with the release of Vertex version 3.3. The most exciting new feature is video DICOMization which allows the end user to turn standard video formats into DICOM multi-frame secondary-capture or DICOM MPEG formats with an intuitive drag-and-drop to motion.

Another exciting feature is the ability to create new DICOM studies from non-DICOM objects such as popular image formats and office documents. This new feature allows facilities to better utilize existing hardware and share more complete patient study information.

For current users, please contact your sales representative to receive a full list of features. Inquiries can be sent to sales@sorna.com.

ABOUT SORNA CORPORATION

For over fifteen years, Sorna has developed groundbreaking solutions that simplify the distribution and management of medical studies for healthcare professionals. Since its founding in 1999, Sorna has offered an evolving suite of software and CD / DVD burning systems that have improved the medical information sharing workflows of thousands of healthcare facilities worldwide. History has proven Sorna's commitment to delivering industry-leading, first-of-their-kind products that support their motto: Harmony. Innovation. Simplicity.
