Sorna Partners with Diagnos – the Leading Columbia Imaging Solutions Company

* * * * *

(Eagan, MN) February 19, 2014 - Sorna Corporation, a leader in digital medical image and data sharing systems, continues to expand its global footprint by partnering with Columbia-based medical imaging solutions company, Diagnos Smart Radiology.

Diagnos' expert team combines years of experience in imaging departments throughout Columbia to produce a product portfolio along with service options that provide best-of-breed solutions to modern day Radiology departments. Diagnos is recognized for its unique ability to analyze imaging service processes and build solutions to reduce operator time and avoid re-processing, resulting in improved overall quality and profitability.

Juan Sebastián Torres G., Director de Tecnología says "We are excited to be working with Sorna. Vertex® is the perfect program to round out our product portfolio. It solves some of the greatest data sharing issues faced by medical imaging departments. Importing, DICOMizing and exporting to a limitless number of destinations allows departments to move away from multiple programs and greatly streamline their process."

"Expanding our global footprint into Central and South America, we needed a strong partner. Diagnos Smart Radiology, with its knowledgeable, experienced, and professional team is the perfect choice", said Cyrus Samari; Vice President, Sales and Marketing at Sorna. "With Vertex's planned release in Spanish, and Diagnos' support, imaging departments in the region will be able to streamline operations and improve patient healthcare."

About Sorna Corporation

Sorna Corporation designs and manufactures DICOM and IHE conformant products that facilitate the sharing, burning, importing, converting, viewing, and storing of medical studies, images, and related documents from a variety of sources, to a multitude of destinations. Since 1999, Sorna has led the way in anticipating the data sharing needs within healthcare. Industry experience and engineering expertise allows Sorna to respond with innovative solutions, making the sharing and management of medical studies easier and more convenient for healthcare professionals.
