

# vertex<sup>®</sup> SHARE

## Stream Data Directly to Patients and Providers

### How do I share?

1. Using Vertex; combine, edit, and package the data to be shared.
2. Enter new or select from existing email address(es).
3. Select any additional destinations (CD USB, ...).

### How do they access?

1. Receive the email with a time-sensitive link to the data package.
2. Click on the link and input the access code to retrieve the content.
3. Select data format and viewer; download.

## How does Vertex SHARE benefit your organization?

- » Studies, papers, office documents, visible light images, and videos can be combined by Vertex – simplifying enterprise image sharing.
- » Packaged data can be sent to multiple Destinations (CD, USB, ...) in the same job – eliminating duplication of effort.
- » Utilizing IT-friendly, outbound-only connections – Vertex SHARE eliminates creating in-bound firewall exceptions.
- » Data is retained locally and only streamed on-demand – reducing security risks, minimizing upload bandwidth, and significantly lowering costs.
- » No account set up is necessary for recipients – saving time and money.
