**Budget friendly and easy to use software for exporting studies to local and removable drives. Add a viewer and choose to encrypt the data protecting patient PHI.**

With its ability to copy to removable media as well as local and network drives, Export is best used for small imaging centers, or as a backup to an automated CD burner. It can also be utilized to anonymize data for teaching purposes. Add Vertex SHARE to enable cloud brokered image sharing.

**Create standards compliant DISCs:** Utilizing Vertex's intuitive interface, users are able to burn studies to local CD-R, DVD-R, and BD-R drives – fully conformant to DICOM and IHE standards.

**Export studies to removable Media:** DICOM studies can be copied to USB and other removable media for distribution to patients, healthcare facilities, and referring physicians.

**PHI Security:** Choose only the studies and series you wish to import. Eliminate the need to import non-essential studies – saving time, storage space, and reducing liability.

**Copy studies to drives:** Share studies directly with authorized professionals within your facility using local and network drives.

**Embedded Viewer:** Developed in-house, our intelligent and easy-to-use embedded viewing software improves your referring physician and patient experience.

**PHI Security:** Encrypt the data to comply with DICOM and FIPS 140-2 requirements. The required password can be generated by four different methods, depending on preferred workflow (on-demand, pre-set, DICOM tag, random).
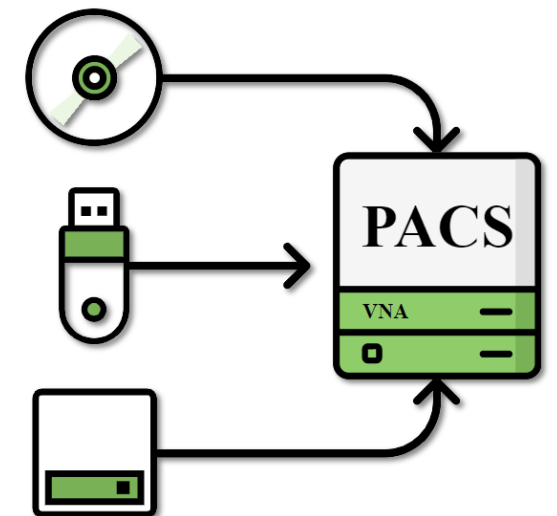

**One-Click De-Identification:** Quickly and easily create teaching files and/or research projects

**Track all activity:** Data exported from Vertex are tracked within its database for HIPAA compliance

**Unlimited client License:** Any number of authorized users, groups, or workstations can utilize Vertex Export without running into licensing limitations or extra fees

**Client Access Control:** For security and regulatory purposes, individual users, groups, or workstations can be configured to have access to incoming devices and export destinations

**Workflow simplifications:** Minimize operator responsibility and reduce human errors with predefined routing rules.

**sorna®**

# Vertex Platform

Medical imaging made easy- the most affordable, scalable medical data systems

**vertex. SHARE**

Cloud-brokered medical data sharing

**vertex. CD**

Automated DICOM CD burners plus CD importing

**vertex. video**

Post-process and convert exiting video files to DICOM

**vertex. capture**

Compact, economical video recorder integrated with Vertex Video

**vertex. scan**

Add Paper Film, Digital Images and Documents to PACS- scan paper or film and include images and documents in studies

**vertex. import**

Reconcile Incoming DICOM and Proprietary Studies- Import DICOM and proprietary data from CDs and removable media

**vertex. export**

Manually send to local CD burner, removable media, and drives

**vertex. SDS**

Securely send studies using DICOM TLS with no VPN

**vertex. route**

Scheduled, Intelligent routing to any device

# REVIEWER

Manage internally and externally generated DICOM and non-DICOM medical images within your role and workflow with Reviewer.

**Reviewer CD**
View and browse files on every CD (DICOM and proprietary) with this easy-to-use, FREE DICOM viewer software

**Reviewer MD**
Burn, view, store, import, and share studies from a variety of sources; send to a printer or create an encrypted DISC on the fly

**Reviewer Admin**
View, import, burn, share, scan, re-identify, encrypt, and MORE; do it all with this Master Edition

**Sorna**
