FOR IMMEDIATE RELEASE

Sorna Corporation to Release Vertex Enterprise CD

EAGAN, MN – May 17, 2021 – Sorna Corporation continues to innovate enterprise imaging with the announcement of Vertex Enterprise CD – replacing Vertex CD. The new release expands the patented Vertex CD features allowing management and use of multiple CD burners from a single instillation of Vertex Platform application server. Administrators can now configure user, groups, and workstations to access authorized burners.

Furthermore, other Vertex Platform applications can be activated and managed on the same server - providing additional easy to use functionality (SHARE, Scan, Import) and efficiency to authorized users.

“With the Vertex Enterprise CD release, customers utilizing Vertex Platform can now replace multiple applications from different suppliers with Vertex – significantly decreasing costs, simplifying operations, and streamlining training.” – Cyrus Samari, Executive Vice President.

For current users, please contact your sales representative to receive a full list of features. Inquiries can be sent to sales@sorna.com.

ABOUT SORNA CORPORATION

Since 1999, after pioneering automated CD production, Sorna has developed groundbreaking solutions that simplify the distribution and management of medical studies for healthcare professionals. In 2020, Sorna expanded its substantial footprint in the enterprise imaging market by introducing the Vertex Platform – a collection of individually-licensed applications designed to simplify enterprise imaging needs. We continue our commitment to delivering industry-leading products that support our motto: Harmony. Innovation. Simplicity.
