

**Avoid the cost and hassle of setting up and maintaining VPN connections with partner organizations and providers.**

Simply and securely track and send DICOM studies and reports directly from one site to another – with Vertex SDS. Utilizing DICOM TLS, you avoid the setup, and cost associated with traditional VPN or Cloud providers.

**Securely Send DICOM Studies:** Simply send DICOM studies and reports directly from your site to a partner – securely through Vertex SDS.

**Receive DICOM Studies:** Vertex conforms to DICOM PS 3.15-2011 Annex B standard so it can also receive from other conforming products.

**Always Encrypted:** The data is encrypted in transit utilizing Transport Layer Security (TLS) and adheres to FIPS 140-2.

**No Cloud Storage:** Vertex SDS sends directly to another facility avoiding any third-party cloud environment. SDS is a direct secure DICOM connection – absolutely no cloud storage.

**Great for Referring Physicians:** Avoid the cost of setting up and maintaining VPNs. They can also send to and receive from multiple sites with one set up.

**Fast Delivery:** Reduce the delays in communication of time sensitive medical information. No more waiting for a CD/DVD to be delivered.

**Use SDS with Other send to Destinations:** Along with SDS, facilities can still send to a CD burner, cloud provider and any other export to destination.

**Flexible Workflow:** Use Vertex’s automated processing or its drag-and-drop user interface to share with patients and providers.

**Enterprise Data Sharing Option:** Add Vertex Scan to collate, package, and share DICOM studies, paper, film, office documents, visible light images, and other digital content.
